

## Week 6 Assessment

### Part 1: Manual Testing

#### **Test Cases:**

Check to see if the correct player wins the game when 3 X's or 3 O's line up.

Check to see if you're able to place a piece on any empty spot.

Check to see if the computer places its piece on board during its turn.

#### **Bugs:**

When you win, game says you lose.

When computer wins, game says it loses.

The computer uses both uppercase and lowercase O.

On computer's 3rd or 4th turn, it does not place an O in an empty spot.

Game won't let you place an X in the left box of the 2nd row (4th spot)

Player can place X on a square that originally had an O on it.
